SUMMARY

Flutter Developer with experience building cross-platform mobile apps using Flutter, Dart, Firebase, and Supabase. Skilled in state management (Bloc), REST API integration, and UI/UX implementation. Passionate about delivering clean, performant applications and growing within a product-focused team.

EDUCATION

Delta Technological University

Bachelor of Software Engineering [Grade: very good]

Sep. 2020 – July 2024

Menoufia, Egypt

EXPERIENCE

ITC Company

Mobile Application Development Scholarship

Aug 2024 – Feb 2025

Tanta, Egypt

- Developed and launched **cross-platform applications** using **Flutter** and **Dart**, resulting in a 50% increase in app downloads and a 98% crash-free rate.
- Enhanced **state management** practices and applied best techniques for **performance optimization**, achieving a 40% increase in user engagement and reducing development time by 25%.
- Collaborated with a team to design and implement **GPS-based** and **Firebase-integrated applications**, delivering features on time and meeting client requirements.
- Applied **Agile development methodologies** to manage project timelines and ensure high-quality deliverables.

Udemy

Complete Flutter And Dart Development Course

May 2023 – June 2023

Online

- Completed a comprehensive course on **Flutter** and **Dart**, covering advanced topics such as **state management**, **async programming**, and **Firebase integration**.

PROJECTS

EduConnect LMS (Video Conference System) | Flutter, Supabase, LiveKit, LTI 1.3

Mar 2026 – Present

- Developed an enterprise-grade video conferencing platform tailored for Saudi universities, integrated directly with **Blackboard** via the **LTI 1.3 Advantage** standard.
- Implemented secure Single Sign-On (SSO) and identity management using **OIDC** and **RSA-256** signature verification to ensure strict institutional data privacy and security.
- Integrated **LiveKit** to provide low-latency, scalable video streaming, featuring interactive tools such as synchronized digital whiteboards, breakout rooms, and live student polling.
- Engineered an automated attendance tracking and session archiving system using **Supabase**, calculating net student participation and generating detailed institutional engagement reports.
- Architected a real-time classroom management dashboard allowing instructors to control participant permissions (mic/cam locks), manage Q&A, and synchronize live assessments.

Harafi App | Flutter, Supabase, Dart

May 2026 – Present

- Developed a comprehensive service marketplace platform connecting professional technicians with clients for various home maintenance and repair services.
- Built a secure technician onboarding system featuring identity verification through document uploads and professional profile management.
- Integrated **Supabase** for authentication, real-time PostgreSQL database management, and cloud storage for efficient media handling.
- Implemented core business logic for order lifecycle management, area-based service filtering, and dynamic pricing models for different professional crafts.

- Developed a social platform app that allows users to share thoughts and interact anonymously in a safe environment.
- Implemented a reporting system to handle inappropriate content and ensure community safety.
- Designed a clean and engaging UI/UX to improve user interaction and retention.
- Integrated Firebase Authentication and real-time database for seamless user experience.

- Multi-tenant SaaS platform for nursery management, featuring distinct portals for Owners, Staff, Accountants, and Parents.
- Architected a robust Role-Based Access Control (RBAC) system using Firebase Auth Custom Claims and granular Firestore security rules.
- Implemented real-time child tracking, digital attendance, and automated daily reports to streamline communication between nurseries and parents.
- Integrated a subscription-based billing system and a referral program to drive platform growth and manage recurring payments.
- Optimized app performance by implementing Clean Architecture and efficient state management, ensuring a seamless user experience across different user roles.

- Designed and developed a **smart safe** app using **Flutter** and **Firebase**, integrating **GPS** for real-time location tracking and implementing advanced **security measures** for data protection and user privacy.
- Achieved a high user satisfaction rate through intuitive **UI/UX design** and robust feature implementation, with a focus on security and performance.
- Conducted extensive **user testing** and gathered feedback to refine features and improve overall app functionality.

PERSONAL SKILLS

- Effective Communication:** Ability to communicate clearly and actively listen to customers.
- Problem Solving:** Capable of providing quick and efficient solutions to customer complaints and inquiries.
- Work Under Pressure:** Able to perform in fast-paced, demanding environments.
- Negotiation:**Strong negotiation skills to resolve conflicts and ensure customer satisfaction.
