Professional Summary

Flutter Developer and Software Engineering graduate with hands-on experience building cross-platform mobile applications and backend-integrated products. Experienced with Flutter, Dart, BLoC/Cubit, REST APIs, Firebase, Supabase, PostgreSQL, and real-time communication.
Built applications across education, SaaS, social platforms, and home-services marketplaces, with practical experience in authentication, role-based access control, real-time features, database integration, and product workflows. Strong foundation in software engineering principles with a focus on writing maintainable code and turning product requirements into reliable mobile experiences.

Technical Skills

Mobile Development: Flutter, Dart, Cross-Platform Development, Responsive UI

State Management: BLoC, Cubit

Architecture: Clean Architecture, MVVM, Dependency Injection

Backend & APIs: Supabase, Firebase, REST APIs, Authentication, Real-Time Database, Cloud Storage

Databases: PostgreSQL, Firestore, Firebase Realtime Database, SQL

Real-Time & Integration: LiveKit, LTI 1.3, OIDC, GPS/Location Services

Development Tools: Git, GitHub, VS Code, Android Studio, Cursor, Codex, Antigravity IDE

Programming: Dart, Java, Python, C++, C

Computer Science: Object-Oriented Programming, Data Structures, Algorithms, SDLC, Software Engineering

Selected Projects

Harafi ↗ – Home Maintenance Services Marketplace | ***Flutter, Dart, Supabase, PostgreSQL*** **May 2026 – Present**

- Designed and developed a mobile marketplace connecting customers with home maintenance technicians, covering technician onboarding, service requests, and order workflows.
- Implemented separate customer and technician workflows, including technician profiles, service requests, and request lifecycle management.
- Built technician onboarding and identity document submission workflows using Supabase Authentication, PostgreSQL, and cloud storage.
- Implemented location-based service filtering and real-time application workflows to support the service booking experience.

Enterprise Real Estate & CRM Platform ↗ | ***Flutter (Web/Mobile), Supabase (PostgreSQL), REST, SWR Caching*** **2026**

- Engineered a responsive, bilingual (Arabic/RTL-first) Real Estate CRM and public portal using Flutter Web and Supabase, streamlining multi-branch inventory management and customer lifecycles.
- Implemented a caching strategy with local state persistence, ensuring instantaneous page rendering and offline resilience for field agents.
- Integrated an interactive conversational AI widget that qualifies prospect inquiries 24/7, persisting structured leads into an automated CRM pipeline.
- Built an automated property-matching algorithm matching client budget, location, and typology directly against active property stock during manual lead entry.
- Architected role-based data security via PostgreSQL and cascading constraints; enabled dynamic tour scheduling, automated status archiving, and direct WhatsApp sharing hooks.

EduConnect LMS ↗ – Real-Time Video Conferencing Platform | ***Flutter, Supabase, LiveKit, LTI 1.3*** **Mar 2026 – Present**

- Developed a real-time video conferencing platform for Saudi universities with integration to Blackboard using the LTI 1.3 Advantage standard.
- Implemented authentication flows using OpenID Connect (OIDC) and RSA-based signature verification.
- Integrated LiveKit for real-time video communication, supporting interactive classroom features such as whiteboards, breakout rooms, and live polling.
- Developed instructor-facing classroom management workflows and automated attendance tracking using Supabase.

Nursera ↗ – Multi-Tenant Nursery Management SaaS | ***Flutter, Firebase, Firestore*** **Apr 2026 – Jun 2026**

- Developed a multi-tenant SaaS application for nursery management with separate workflows for owners, staff, accountants, and parents.
- Implemented role-based access control using Firebase Custom Claims and Firestore security rules.
- Built real-time attendance tracking and automated reporting features for daily nursery operations.
- Implemented subscription and referral management workflows within the application.

Ahki ↗ – Anonymous Social Application | ***Flutter, Firebase, Dart*** **Feb 2026 – Apr 2026**

- Developed an anonymous social application for sharing thoughts and interacting with other users.
- Integrated Firebase Authentication and real-time database functionality for user interactions.
- Implemented content reporting and moderation workflows to support a safer community experience.
- Designed responsive mobile interfaces focused on usability and consistent user experience.

Professional Training

ITC Company **Aug 2024 – Feb 2025**
Mobile Application Development Trainee *Tanta, Egypt*

- Completed practical training focused on mobile application development using Flutter and Dart.
- Developed cross-platform application features involving state management, Firebase integration, and GPS-based functionality.
- Applied software development practices throughout the mobile application development lifecycle.

Udemy **May 2023 – Jun 2023**
Complete Flutter and Dart Development Course *Online*

- Completed structured training in Flutter and Dart, including asynchronous programming, Firebase integration, and state management.

Education

Delta Technological University **Sep 2020 – Jul 2024**
Bachelor of Software Engineering – Grade: Very Good *Egypt*

Additional Information

Languages: Arabic (Native), English (Professional Working Proficiency)

Military Service: Completed
